**All Natural**  
**100% Grass Fed**  
**Whey Protein Isolate**

Our custom-made all natural New Zealand grass feed whey protein isolate is considered one of the absolute cleanest and purest protein supplements in the entire world, and it all comes down to the cows. New Zealand is regarded as a world leader in the industry because of their advanced and natural methods in producing.

Most cows are injected with drugs and are fed with cheap grains that are littered with chemicals, fertilizers, and pesticides.

New Zealand grass fed cows, however, graze on nothing but pure grass, roam freely, and they are not injected with drugs such as antibiotics, or hormones (i.e., rBST - recombinant bovine somatotropin). In addition, whereas some proteins are

sweetened with chemicals and artificial sweeteners, this protein is sweetened only with the highest grade of stevia, an all-natural, plant-based sweetener.

Our whey isolate uses cross flow micro-filtration (cold processed), which yields an undenatured protein, keeping intact all of the sub-fractions, including an extremely high amount of immunoglobulins. In addition, this extensive filtering provides a product which is almost 95% pure protein per serving, all without fats, carbohydrates, and cholesterol. Whey concentrates, on the other hand, are around 80% protein per serving, with the final 20% coming from fats and carbohydrates. As a result, the consumer receives less protein per serving.

Not only is our Whey Isolate superior to other brands, it is also Soy Free! Our agglomeration process uses only sunflower lecithin, not soy, to make our product water-soluble, creating a product that mixes very easily.
